

NGC cable assembly

1. If recycling a cable from a broken controller, or if using an extension cable, cut the cable 10-40cm from the plug.
2. Strip 3-5 cm of the outer insulation sleeving from the cable
3. Isolate the inner wires from the cable and strip 5mm from the 5V, GND and Data wires, which are yellow [Pin 1], red [Pin 2] and green [Pin 3] respectively on OEM hardware. Cut down the remaining wires and terminate them with insulated tape
4. Crimp each wire with a female Dupont crimp in line with the crimping guide

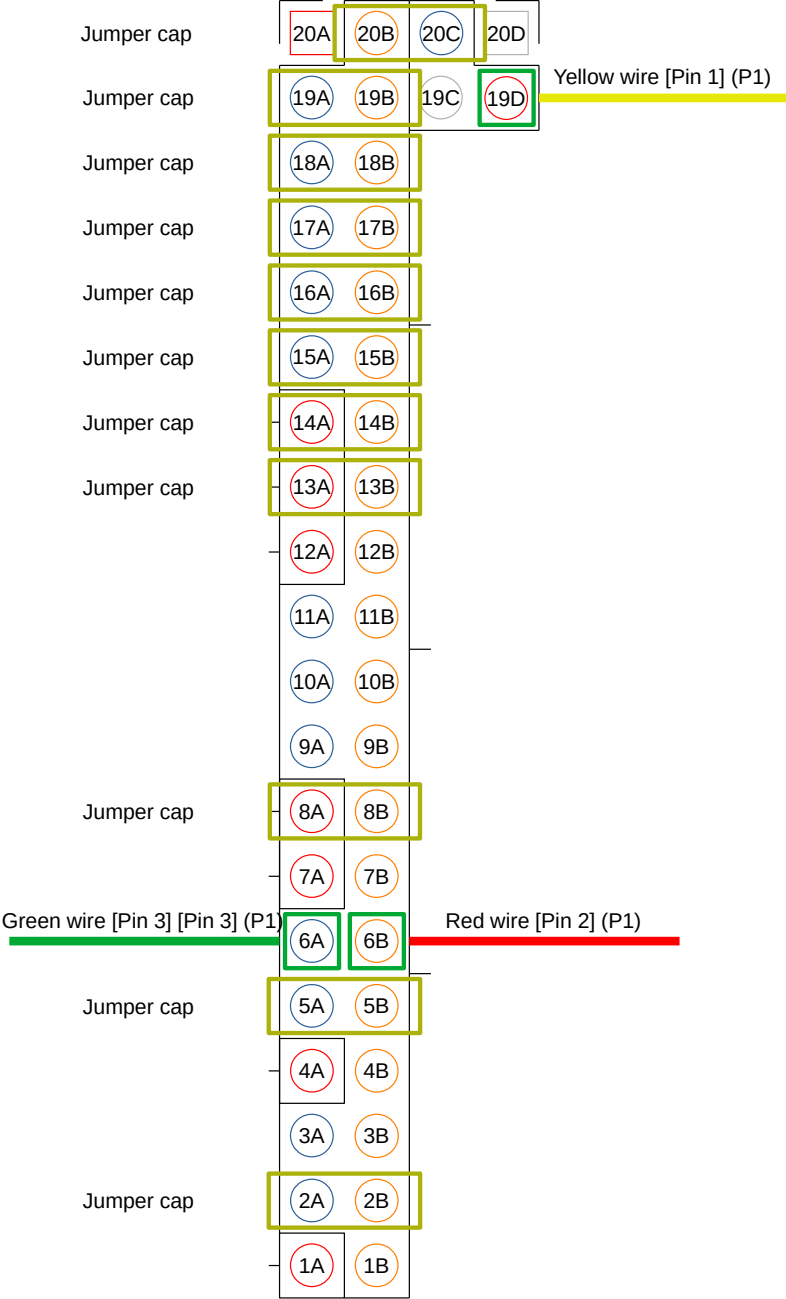

Crimping

1. Place the wire in a female Dupont crimp
2. Fold the pull relief around the wire

3. Use a crimping tool to shrink the connector around the wire ends
4. Slide the connector housing onto the crimp until it mounts, making sure the orientation is correct

NGC 1 Player connection diagram

NGC 1 Player connection guide

1. Place the jumper caps on rows 2, 5, 8, 13, 14, 15, 16, 17, 18 and 19
2. On row 20, place the jumper cap across the two central pins (20B & 20C) of the row
3. Connect the red wire [Pin 2] to pin 6B
4. Connect the green wire [Pin 3] to pin 6A
5. Connect the yellow wire [Pin 1] to pin 19D
6. Connections should now resemble the following diagram
